

Guide: Installing Managed Software (Baseline) in JumpCloud for Apple Devices.

1 Navigate to <https://console.jumpcloud.com/#/managedSoftware/apple>

2 Click here.

The screenshot shows the JumpCloud console interface. On the left is a dark blue sidebar with the JumpCloud logo and navigation menu. The main content area is titled "Software Management" and has tabs for "Windows", "Apple", and "Google". The "Apple" tab is selected. Below the tabs is a search bar and a table of installed software. The table has columns for "Name", "Supported Devices", and "Location Name".

	Name	Supported Devices	Location Name
<input type="checkbox"/>	1Password		https://downloads.1password.com/mac/1Passwor
<input type="checkbox"/>	1Password 7 - Password Manager	Mac	KLAASSEN CONSULTING
<input type="checkbox"/>	1Password - Password Manager	iPhone, iPad, iPod	KLAASSEN CONSULTING

3 Press **cmd + v**

4 Click the "Example: Google Chrome" field.

ged Software

save

The screenshot shows a software management interface with a modal dialog box overlaid. The dialog box contains instructions about software installation and management. The background interface is dimmed and shows a table of device groups. The 'save' button in the dialog is highlighted with a red circle.
